

The NSW Stem Cell Network
& Diabetes Transplant Unit
presents

28-30 April 2006
3rd Stem Cell Training Course:

Learn to grow human embryonic stem cells (hESC)

Intensive 3 day training course to teach qualified scientists the skills required to grow hESC. Tissue culture experience is a prerequisite.

Course Supervisor: Dr Kuldip Sidhu, received national and international press coverage in January 2006 for producing the first national and third international human embryonic stem cell line without the use of any animal products.

***Cost:* contact Sophie regarding course fee**
